

# Warmup makes you compliant with new Boiler Plus Regulations

The Boiler Plus initiative aims to deliver the following by improving the efficiency of heating in the United Kingdom:

- ⊕ To enable homeowners to make tangible savings on their energy bills
- ⊕ To give homeowners more choice over their heating consumption
- ⊕ To give homeowners more control of their heating

## What do you need in order to be compliant with Boiler Plus?

To install one of four energy-saving technologies:

- ⊕ *Flue gas heat recovery systems*
- ⊕ *Weather compensation controls*
- ⊕ *Load compensation controls*
- ⊕ ***Smart Controls with Automation and Optimisation***

The easiest way to comply with Boiler Plus regulations is to install a Warmup 4iE & +Kit

The 4iE with +Kit is a *Smart Control with Automation and Optimisation* compatible with combi boilers.

**All** gas  
combi  
installations  
must now  
comply with  
**Boiler Plus**

*“The 4iE has built-in Automation and Optimisation - making it work like magic.”*

Andrew Stimpson, CEO, Warmup Plc

### Automation with 4iE

The 4iE & +Kit have built-in **SmartGeo technology** which uses the location services built-into smartphones to determine how far you are from home. It uses this information to **automate** heating usage, saving homeowners up to 25% on their energy consumption.

### Optimisation with the 4iE

Warmup's 4iE & +Kit also use advanced technology to calculate the heat-up rate of the system and **optimise** the heating schedule to minimise the energy required to maintain comfort levels.

Find your 4iE & +Kit at a store near you:

[www.warmup.co.uk/store-locator](http://www.warmup.co.uk/store-locator)

**Warmup**

The **4iE Smart WiFi Thermostat** is Warmup's smartest smart thermostat that uses the latest technology to eliminate energy wastage and dramatically improves the efficiency of heating systems.

#### Always at the right temperature

SmartGeo™ technology makes sure your home is automatically warm just as you arrive and running efficiently when you're away.

#### Warmup AutoSwitch - the Best Energy Switch App

Download **AutoSwitch™ app** for automatic tariff switching. Never overpay on your energy bills again, saving you up to £210 a year - download from the AppStore.

#### Easy to use

The 4iE's heating controls are easy to use and it doesn't require programming. The set-up can be completed within a few simple steps.

Combine the **+Kit** with the 4iE to control the central heating system wirelessly.

#### Wireless Receiver

Once connected to the existing boiler, your 4iE and +Kit will communicate wirelessly.

#### Smart Heating

Bringing smarter, more advanced and ecological heating management to central-heating systems.

#### Efficiency

The +Kit's technology offers a quick, efficient solution to Boiler Plus legislative concerns.
