PPWR Packaging Traceability

Introduction and compliance scope

This register lists packaging materials and components and provides the traceability information needed to link each packaging identifier to the relevant product range and supporting PPWR compliance records. It covers the specified DE and UK schedules; inclusion in the UK schedule does not establish that PPWR applies to a UK-only shipment.

The packaging listed below has been tested and found to comply with the applicable tested requirements of Regulation (EU) 2025/40 (PPWR). This register records the relevant packaging identifiers and traceability details.

Not every listed item is included in every shipment.
