

Warmup Infrared Patio Heater

Warmup®

The world's **best-selling** floor heating brand™

Warmup® Patio Heaters are an ecological alternative to traditional fuel based outdoor heating equipment. Our heaters produce a high quantity of warmth, without the adverse effects of polluting, noxious gas.

The lamp emits infrared energy which is directed using a special parabolic reflecting structure. The design of the heater allows you to direct the warmth exactly where you need it.

Our heaters produce a soft, gentle light - perfect for cosy outdoor dinners for you and your guests. The heaters are waterproof and dust-proof (IP65 rated) and safe to use outdoors in any weather.

Features:

- Heaters can be fixed or you can purchase a tripod to give flexibility to move the heater
- Heats-up in seconds, provides coverage of c.10m²
- Cost effective - 5 times CHEAPER to run than an equivalent gas heater
- Heaters are water-resistant
- Guaranteed for 5,000 hours of usage
- No need to refill

Technical data:

- Supply voltage: 220-240V, 50Hz
- Dimensions: 835x112x84mm
- Weight: 1.02kg
- Wattage: 1760W
- Amperage @230VAC: 7.7A
- Coverage: 8-10m² (Depending on installation height)
- IP rating: IP 65 (Insulating class I)
- Warranty: 5,000hrs*
- Approvals: CE

*(Equates to approx. 20yrs under normal domestic use)
